

EMMANUEL TIGOUÉ, CISSP

AI Security Engineer | Security Engineering & Agentic Systems

Atlanta, GA | 404-839-2214 | etigoue@tigouetheory.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | U.S. Citizen

CERTIFICATIONS

CISSP | SecurityX | CCNA | Security+ | AWS Security Specialty (in progress)

EXPERIENCE

AI Security Engineer | CoreDirective

Atlanta, GA | Sep 2025 - Present

- Architected Squire, an AI SOC analyst on LangGraph with human in the loop approval gates, pgvector RAG, NeMo Guardrails PII redaction, and Langfuse tracing. Squire drafts a triage verdict for every alert, cutting hands-on triage time **80%**.
- Threat modeled the OpenClaw AI gateway (Claude Fable 5) against the OWASP LLM Top 10 and MITRE ATLAS, covering cloud and on prem inference paths.
- Ran AI red teaming and vulnerability management across the agent stack: prompt injection, jailbreaks, data leakage, excessive agency. Remediated **6** high and medium findings before launch.
- Embedded Semgrep SAST, Trivy SCA, and Gitleaks secrets scanning into CI/CD. Added OWASP ZAP DAST against staging and Cosign signing with unsigned images blocked at the registry.
- Enforced zero trust access and runtime defense with Cloudflare WAF, mTLS tunnels, and Falco eBPF detections mapped to MITRE ATT&CK. Detection tuning cut daily Datadog alerts from **200+ to 12**.
- Authored **57** GRC documents mapping **133** NIST 800-53 controls plus NIST AI RMF, SOC 2, and ISO 27001, with a Promptfoo eval harness for continuous control testing.

IT Security & Operations Manager | Texaco

Atlanta, GA | Mar 2022 - Mar 2026

- Led incident response for 3 retail locations: POS skimmer attempts, credential compromise, unauthorized vendor access. A 6 step IR runbook cut containment from **8 hours to 90 minutes**.
- Deployed Splunk as the SIEM with log ingestion from **45+** endpoints and network devices across 3 sites, then built correlation rules and response automations on top. Detection time fell from **48 hours to under 4**.
- Segmented a flat network into isolated VLANs for POS, back office, guest WiFi, and management traffic, validated with Nmap.
- Hardened Active Directory with GPO baselines, stale account cleanup, removal of standing admin rights, and automated credential rotation. Closed **12 of 14** critical audit findings.
- Owned PCI DSS compliance and vulnerability management for **45+** endpoints: quarterly authenticated Nessus scans, risk ranked remediation, SAQ documentation current with the payment processor.
- Automated patch deployment, user provisioning, and compliance reporting with Python, PowerShell, and REST APIs, cutting manual ops work by **12 hours a week**.

TECHNICAL SKILLS

AI Security: adversarial ML, LLM guardrail design, agentic architecture review, OWASP ML Top 10

Cloud & Automation: AWS, DigitalOcean, Terraform, Docker, HashiCorp Vault, OPA policy gates, n8n, Ollama

Identity & Access: Teleport JIT PAM, Keycloak SSO, RBAC, MFA enforcement, least privilege design

Frameworks: NIST AI RMF, NIST 800-53, ISO 42001, SOC 2, ISO 27001, PCI DSS

EDUCATION

Georgia State University, Andrew Young School of Policy Studies

B.A. in Economics | 3.7

A.S. in Business Administration | Dean's List
